Summary

I am young, energetic and can learn quickly and solve problems efficiently. I have Developed 6 projects using (React JS, Nodejs, mongodb, Bootstrap) and one project using ADO.Net Entity Framework following MVC architecture. Now I am seeking job as a junior web developer.

Skills

Comfortable: JavaScript, ES6, React JS, HTML, CSS, Bootstrap, C#, OOP, ADO.Net Entity Framework, React Hook, React Router, firebase authentication, REST API

Familiar: Node.js, Express.js, MongoDB, Mongoose, C, Redux, Material-UI, PHP, MySQL

Tools: Git, VS Code, Chrome Dev Tools, Heroku, Netlify, Firebase, Jira, Trello, CodeBlock, Microsoft Visual Studio , SQL server 2012

Projects

Creative Agency: [Live-Website](#) [Client-Site-Code](#) [Server-Site-Code](#)

- Responsive landing page. On home page show all services and some reviews.
- Two types of User Admin and Customer. Everyone can log in using google account and see their dashboard as their user type.
- Admin can add another admin, change order status and add service. Customer can make orders, see their own orders and make a review.

Technology: React JS, MongoDB, Nodejs, Bootstrap 4, Firebase.

Volunteer Network: [Live-Website](#) [Client-Site-Code](#) [Server-Site-Code](#)

- On home page show all volunteering items. If select any item goes to login page and user can log in by google account.
- After login user go to the registration page and register their selected items. One user can select one more volunteering item.

- The user can cancel their events and can see all events they selected.

Technology: React JS, MongoDB, Nodejs, Bootstrap 4, Firebase.

Travel Guru: [Live-Website](#) [Client-Site-Code](#)

- User can select any place from the home page and go to the booking page and place and set a time.
- User can login with Facebook, Google account or Email.
- After login user can see the hotels in their selected place and see the map.

Technology: React JS, Bootstrap 4, Firebase, google map.
